Children enrolled in this program turn 5 during the 2025-2026 school year and are ready for a more structured day of learning readiness skills for kindergarten. It is an opportunity for pre-K students to develop physical, language, social-emotional and cognitive skills as well as exposure to early math, science and literacy concepts. Our program is staffed by certified teachers with many years of experience and we maintain a ratio of 13 children to 2 teachers. Children will have fun in a safe, nurturing environment with many areas of play. Our daily activities include free play, small group learning, outdoor play, music, movement, art, dramatic play and literature. There are thematic units throughout the year which tie together the curriculum areas of language arts, mathematics, social studies and science.
